

8mm Rubber Nut Insert 5pc

Rubber and metal expanding well nuts, with M8 thread. These removable and reusable fasteners feature a rubber body, with a metal threaded insert, and can be fitted by hand without the use of a RivNut gun. They are designed to insulate against heavy vibrations (helping to reduce noise), electrical currents, and form a water-tight seal when installed. Suitable for automotive, marine and aerospace applications.

Additional Information

- Dimensions 15mm long x 16mm diameter (for 16mm hole size).
- Isolates from both vibration & electricity.
- Also resists water ingress when installed.
- Black rubber well nut.
- Pack of 5. Also available in Connect assorted rubber nut insert set 40pc (Part No. 32452).
