

## Windscreen Washer Pipe Repair Kit

This windscreen washer pipe repair kit has been brought together as a one stop box, offering the most common components found in windscreen, headlamp and rear window washer systems allowing the technician to replace broken and degraded hoses, as well as stuck or leaking one-way valves. In addition the use of a clear hose ensures any blockages or air bubbles can be clearly seen, aiding future system diagnostics.

### Additional Information

- Contents: 3/16" (4.7mm) 90° elbow joints (x5), straight joints (x5), T-piece connectors (x5), one way valves (x2), 4m clear PVC tube.
- Pipe cutting tool included to ensure clean straight cuts every time.
- No clips required: clear, quality PVC hose sized to fit securely to the kit connectors, especially helpful where space is at a premium.
- Ideal for one off, historic & kit car windscreen washer system manufacture.
- All parts available separately, see Connect Part Nos. 30896 (90° elbow joints 5pc), 30897 (straight joints 5pc), 30895 (T-piece connectors 5pc), 30899 (one way valves 5pc), 30893 (4.8mm ID tube 30m), 2727 (mini hose cutter).
